SPINDLE/PICKET CAPS

Since our inception in 2008, Quality Fence USA has quickly rose to one of the premiere PVC fence manufacturers in the Northeast region. We are family owned and now in our 4th generation! Every inch of our products are manufactured in Merrick, NY. We pride ourselves on producing a truly American made product!

Our sister company, QualityLineals USA, specializes in extruding fenestration products for the window industry. Along with our parent company, Northeast Windows USA, Multiple window fabricators across the region use our vinyl in their own production lines. Our fenestration products are tested by the American Architectural Manufacturers Association (AAMA) multiple times unannounced a year. They test for the vinyl integrity, purity, strength, & weathering. We have passed Gold Label standard for the last 25 years. All of our fencing extrusions are manufactured using the same window grade PVC. We are so proud of our quality that all of our extrusion products come with a lifetime warranty!

Unlike our competitors, we do not deal with the general public or home owners. We do not install, nor do we go on estimates. We are looking to work alongside you as your partner, not competitor.

On the back of this page are our current PVC profile offerings. We urge you to reach out to us if you are interested in any of our offerings. We promise you it will be the best decision you make.
